

In the claims:

Please add new claims 64-66, as follows:

- 61
- Sub I
64. (New) A method of making a polyketide comprising:
- a. providing a transformed host microorganism containing a gene according to claim 1 operably linked to the act I promoter of *S. coelicolor*, said host being a microorganism other than *S. coelicolor*; and
 - b. culturing said transformed host microorganism to effect synthesis of said polyketide.
65. (New) The method of claim 64, wherein said host microorganism also contains the act II - orf 4 activator of *S. coelicolor*.
66. (New) The method of claim 65, wherein said transformed host microorganism is *S. erythraea*.

REMARKS

The claims presented by this amendment are directed to a particular aspect of applicants' invention, which is described in the present specification at page 10, lines 16 through 19 and page 18, line 30 through page 19, line 30.
